

equips Maine communities, landowners, and conservation partners with tools to protect, restore, and connect important habitats and ecosystems in a changing climate.

Habitat Connectivity

Conserved Lands, Undeveloped Habitat Blocks & Habitat Connectors

Windsor

Focus Areas of Statewide Ecological Significance

A detailed map of the Kennebec River watershed in Maine. The map shows the river's course from its headwaters in the north to its mouth in the Kennebec Estuary. Key towns and locations are labeled, including Kennebec Highlands, Belgrade, Sidney, Vassalboro, China, Palermo, Somerville, and others. Specific areas of interest are highlighted in yellow and labeled: Kennebec River at Sidney - Vassalboro, Belgrade Lakes and Wetlands, Spectacle and Tolman Ponds, Ducktrap River, Appleton Bog - Peringill Swamp, Bald and Ragged Mountains, St. George River, and Lower Sheepscot Great Salt Bay River and Damariscotta River Estuary. The map also shows the Kennebec Estuary and various other water bodies like Lake Umbagog and Lake Umbagog.
